

Student Funding Portal

Connecting students seeking financial
assistance with institutions and funders

Why do Students, Institutions and Funders need us?

Administering a loan and bursary scheme is very time consuming. It is often characterised by long queues of students, complicated forms, insufficient physical space to host the vast amount of students and misplaced application forms after the process.

We offer a reliable service and instant turnaround time in the administration of these applications on behalf of the student, institution and funder.

Students

Students are able to view an interactive dashboard to identify funding opportunities from institutions and funders. The student can then determine their eligibility for the funding and make their application accordingly.

Institutions

Registered institutions are able to view an interactive dashboard that provides insight into student interest in funding from the institution. It enables them to identify which students will attend their institution with additional financial assistance from funders. The online service provides relief from almost all the administrative time spent on facilitating, completing and capturing applications.

Funders

Registered organizations or individuals can provide loans and/or bursaries to students requiring assistance. These funders are able to monitor their fund allocations and the details of the students who access their funds.

The online portal

- removes all queues allowing thousands of students to register online at the same time.
- prompts and advises students if key pieces of information have not been supplied.
- stores the data in a world-class data centre.
- notifies students once their application has been completed and processed; providing them with peace of mind.

What is the online process?

The Student Funding Portal is designed on a principle of “capture once” for all key information. Individual students may capture their own information or batches of students may be imported by the Institution's Financial Aid Office.

The student funding applications are shortlisted, based on the criteria determine by the funder, and sent to the funder for selection and approval. The funder approved list is then sent to the Institution for registration.

The approval and registration process remains transparent to the funder, institution and student. The institution can register students for a funder according to the budget allocated by the funder. The budget is monitored until all the available funds are allocated.

The registered student is then allocated funds. The allowances portion covering food, books and the like is managed by IntelliMali, in order to purchase goods or services from approved merchants. The student, funder and institution are able to monitor the expenditure at all times.

Comprehensive reports and dashboards are provided. Each report is customized to the requirements of the student, the institution or the funder.
